Professional Photographic Inkjet Printer

Marked with the distinctive red line normally found on professional lenses, the **imagePROGRAF PRO-1000** offers large-format photo prints up to 17" wide in up to 2400 x 1200 dpi resolution. This professional photographic Inkjet Printer can print borderless at up to 17 x 22" as well as work with thick 27.6 mil fine art media.

The PRO-1000 features outstanding FINE printing technology with a large print head. This is leveraged with an 11-color LUCIA PRO pigment-based ink set and a Chroma Optimizer cartridge to create prints with fine detail and a wide, accurate color gamut. The Chroma Optimizer cartridge improves color consistency on coated papers and reduces the difference in ink droplet height to ensure a smooth ink layer and less metamerism.

Mobile Ready

Connectivity is a highlight of the imagePROGRAF PRO-1000, with USB 2.0, Ethernet, and built-in Wi-Fi options available. Wireless printing furthers the printer's capabilities by adding compatibility with PRINT App, PIXMA Cloud Link, and Pict Bridge.

The iOS/Android PRINT App allows users to wirelessly transfer images and files for print from a mobile device, as well as remotely monitor ink levels and printer status. PIXMA Cloud Link provides access to Google Cloud Print for printing documents directly from cloud-based servers.

As a wireless Pict Bridge enabled printer, the PRO-1000 lets you link a Pict Bridge compliant device such as a compatible digital camera or smartphone to the printer through wireless LAN, and print captured images directly without using a computer.

FINE Print Head

The imagePROGRAF PRO-1000 uses FINE printing technology with a 50% larger print head than in previous offerings. FINE(Full-Photolithography Inkjet Nozzle Engineering) works with 1,536 nozzles for each color to produce impressively detailed prints on a variety of fine-art papers with deep blacks and accurate quality colors.

Anti-Clogging

The FINE print head institutes a tubular ink delivery system. This generates faster print speeds and reduces the possibility of clogging. Additionally, ink ejection conditions are precisely checked with sensors, and if a clog is detected, another nozzle automatically provides backup, preventing wasted prints due to clogging and reducing the frequency of nozzle cleaning.

LUCIA PRO Inks

A set of 12 individual ink cartridges consists of 11 standard inks and a Chroma Optimizer cartridge that improves color consistency on coated papers and reduces the difference in ink droplet height to ensure a smooth ink layer and less metamerism. The 11 standard inks include four monochrome inks that reduce bronzing, increase black density, and expand dynamic range in the shadows for excellent grayscale prints.

Fast Image Processing Engine

Equipped with the L-COA PRO Image Processing Engine, the PRO-1000 can quickly and accurately determine printing paths and patterns in order to work as quickly and efficiently as

possible. This enables bordered 17 x 22" photos to be created in just 4 minutes 10 seconds while a two-way vacuum feeder keeps media flat and quickly and accurately feeds the media.

Other Features

A 3.0" color LCD is available on the front of the unit for easily viewing settings and making adjustments

Minimum droplet size of 4pl for finely detailed imagery . 1GB of standard memory for handling large files with ease

Rated EPEAT Silver, ENERGY STAR qualified, and RoHS Directive Certified to guarantee efficient power consumption

Print Studio Pro v2.0 is plug-in for Adobe Photoshop and Lightroom with 16-bit processing will help you easily send high quality large-format files to the printer for making vivid, detailed photographic prints

Media Configuration Tool enables customization of the media settings in both the driver and printer and can make adjustments such as print head height and vacuum strength

Accounting Manager will help users track use and cost of consumables such as ink and media in order to determine print costs, and it can manage a number of users in a multi-unit environment
